ICD 10 feature request

4 messages

Hi,

I really like your app, however there are two features holding me back from a 5-star rating. 1) could you add a way for search bar to be present upon app launch, perhaps at the top of the screen? Kind of a hassle to open up the menu every time I need to search. 2) can you remove the "exit app" confirmation dialog box or at least provide a toggle for it in the settings?

Those 2 features would really solidify your app as the best ICD-10 on the market in my opinion.

Thanks for a great app and the considerations!
-Marcus

Hi Marcus,

Thank you very much for your email!
We want to provide the best experience possible and really appreciate your help.

Marcus, I know your time is precious and I apologize in advance for this lengthy email. If you don't have the time to read and reply don't worry, I really understand.

About the topics you mentioned:

1) Very good point, Marcus. We may add a search icon/button at the top bar in the "Chapters" section (that being the first page displayed after launch), which would redirect you to the "Search" section right away. Do you think that would fulfill your needs?

2) We added that functionality to prevent people from exiting the app unintentionally, but I agree that it might not be necessary to most people. We will take a closer look into the best option, but I really like your suggestion of a toggle in the settings and we will improve it for sure.

I can not guarantee a release date for these updates but I think it may take 1 to 2 weeks (based on our roadmap).
Would you like to receive an email when it is released and available?

Just one last question if I may...
Are you using the ICD 10 or the ICD 10 Pro?

Kind regards,

Matheus O. Castro

Hi Marcus,

how are you?

We are showing our gratitude to the users who helped us to improve the ICD 10 app.
You are one of them for sure!

So, we want to give you **2 promotion codes** so you can download our **ICD 10 Pro** app for **free.**
One for you and the other one to someone you think would like to have it.

First Promo Code: [redacted]

Seconde Promo Code: [redacted]

To use them go to our ICD 10 Pro app page here:

https://play.google.com/store/apps/details?id=com.mistdev.icd

And click the "Buy" button. When asked just insert the promo code and proceed to download the app.
You should not spend any money when doing this.
If you encounter any difficulty, do not hesitate to contact us.

Once again, thank you for your help!

Kind regards,
MistDev Mobile Software Development

This is incredible! Thank you so much. I really appreciate the incorporation of my suggested features but this is going above and beyond! I will continue to spread the word!

Much thanks,
Marcus [redacted]
